NovaTech Systems — Remote Work Policy

NovaTech Systems • Internal Knowledge Base Document

Field	Value
Document ID	NT-HR-004
Version	2.0
Effective date	2026-07-01
Owner department	Human Resources
Last updated	2026-07-01
Status	Active

Purpose and scope

Defines the active hybrid-work model and preserves a historical policy version for retrieval and version-comparison testing.

All names, systems, processes, dates, limits, and examples in this document are fictional and exist only for the NovaTech Systems RAG knowledge-base exercise.

1. Current Policy

CURRENT ACTIVE VERSION: Version 2.0 — Employees may work remotely up to 3 days per week. Employees assigned to hybrid teams must attend the office at least 2 working days per week.

2. Version History

Version	Effective date	Status	Change summary
1.0	2025-04-01	Historical	Hybrid employees could work remotely up to 2 days per week.
2.0	2026-07-01	Active	Remote-work allowance increased from 2 to 3 days per week while retaining a minimum of 2 office days for hybrid teams.

Only Version 2.0 is the active policy. Version 1.0 remains in the knowledge base for historical questions.

3. Eligibility

- Employees assigned to hybrid teams are eligible for the standard remote-work arrangement unless their role or business need requires a different arrangement.
- Fully office-based or role-restricted positions may have different attendance requirements.
- New employees should follow the work arrangement communicated during onboarding.
- Exceptions require manager approval and may also require HR, IT, or Security review depending on the exception.

4. Office Attendance

Hybrid employees are expected to work from the office at least 2 working days each week. Teams may designate collaboration days when business coordination benefits from in-person attendance.

5. Equipment and Work Environment

- Use company-managed devices for company work.
- Maintain a private, reasonably secure workspace when handling confidential information.
- Do not allow family members or visitors to use company devices.
- Report device faults through NT-IT-001.

6. Security Requirements for Remote Work

- Use the approved VPN when required by the application or security control.
- Do not perform sensitive company work over untrusted public Wi-Fi without the required security controls.
- Never store production credentials in local notes, source code, or personal password managers.
- Follow NT-SEC-001 for MFA, device security, secrets, access control, and incident reporting.

7. Working From Another Country

Employees must not assume that remote work from another country is permitted. Cross-border work may create tax, immigration, employment, security, data-transfer, or customer-contract implications. Obtain written approval through the applicable manager and HR/Legal process before working from another country.

8. Exceptions

Exceptions may be approved for documented business or personal circumstances. Approval should identify the duration, expected working arrangement, and any additional security or operational controls.
